

Is your conservatory too hot in the summer and too cold in the winter? **WE HAVE THE SOLUTION!**

Before

After

**Turn your conservatory
into a usable room all
year round!**

KEY BENEFITS OF OUR TILES:

- Ultra light weight - 6kgs per m²
- Exceptional insulation
- DIY simplicity
- 3 tile sheets = 1m²
- Natural stone finish, available in five colours
- Excellent sound absorption
- Cool in the summer and warm in the winter
- Excellent for all lightweight roofing applications, esp. outbuildings

Meet Lightweight Tiles Ltd

We are a family-run business based in Lydney and are proud to be supplying high quality tiles to both professional companies and the average DIY person.

Our product works on a simple "screw together" basis and is therefore very easy and quick to install. There might be other roofing systems out there, incorporating similar principles, however, what separates us from other suppliers is that we are the only company that manufactures roofing sheets from polypropylene, the very same material that is used on high impact plastic car bumpers and wings.

It has huge advantages over the metal roof sheets which are widely available on the market.

One of the reasons why the industry is buying our product in ever-increasing amounts is that our tiles won't dent or crease, so walking on them during installation or maintenance is not a problem. Another advantage is that no special equipment is needed for cutting the tiles, and we supply all the matching

ridge tiles, verge copings and end caps. You can choose from five different colours and all of our tiles come with a granulated natural stone finish (see picture).

All tiles are completely handmade from start to finish using only the highest quality materials. They are suited for conservatories and all light-weight roofing applications, and perform well down to 10 degrees. We also offer a budget tile that is not granulated which works perfectly on garden sheds, so well that re-felting every 4 to 5 years will stop! Thanks to our tile, you will end up with a beautiful profiled roof that can be installed directly on top of your old felt.

We have sold our product to many happy customers over the years and have heard nothing but praise. We believe in our tiles and are 100% familiar with the product, so if you have any questions please don't hesitate to ask, or, if you fancy a trip to Lydney and the beautiful Forest of Dean, why not include a visit to our factory?
